

NO NEW PIPELINES

Don't want a new pipeline running through your life?

- You're not alone -

Thousands of Ohioans are concerned about new pipelines destroying their health, safety, land, and property values.

Like you, these folks are being told that they can't say **NO** to a pipeline even though they don't want one *at all* because they simply don't believe the risks are worth any potential benefit.

...and just like you, they are being told that their only option is to "negotiate the terms (rate of harm to their homes) that they are willing to accept."

THINK THIS IS WRONG?

Find out how you can help your community say **NO** to pipelines
